

Transportation Management

Leave transportation to the experts, while
reducing outbound small parcel and freight costs

When Amware manages both your warehousing and transportation, we create freight efficiencies based on strong carrier relationships. Rather than wait for a carrier to arrive to load out a trailer, our carrier partners drop trailers at our dock and we

load your goods immediately after the order is pulled. When the driver arrives at the end of the day, he or she just hooks up, exchanges paperwork, and is back on the road. Fast. Efficient. Easy.

Why Amware to Manage Your Small Parcel and Freight Deliveries?

Lower costs.

Amware has relationships with major carriers from every transportation mode, both domestically and internationally. Using our aggregate shipment volume, we negotiate favorable rates and pass the savings on to you.

Greater focus.

Amware can handle carrier selection and routing, management of final delivery, and carrier payment, allowing you to focus on what you do best.

Flexible solutions.

Amware transportation specialists are experienced across all modes of transport and can design solutions for any level of complexity.

Improved delivery times.

We have negotiated with our core carriers to extend cut-off times to get freight on its way earlier. The result: faster transit times and increased customer satisfaction.

Robust systems.

Amware's Transportation Management System (TMS) houses all the negotiated rates for each mode of transportation, combined with time-in-transit standards. This allows us to select the most cost-effective carrier based on your requirements.
