

# Amware Inbound Shipping Services

Reduce freight costs 5% to 12% by integrating inbound shipping with fulfillment services

When Amware does not manage freight coming to our fulfillment centers, inefficiencies often follow. Poor coordination with carriers can result in late or unplanned deliveries. When that happens, the receiving process is delayed and

less efficient, and outbound orders may even be impacted. By using Amware's inbound shipping services, together with our fulfillment services, Etailers lower LTL freight costs while off-loading this time-consuming task to experts.

## Why Amware for Inbound Shipping Services?

### Reduce freight costs.

Our buying power with carriers typically results in a 5%–12% reduction in inbound freight costs, net of Amware management costs.

### Free up time.

We manage the carriers. We book the loads. We monitor carrier performance. You manage your business.

### Improve operational efficiency.

When Amware controls the inbound receiving process, we can schedule labor to receive precisely timed inbound shipments, resulting in faster and more efficient processing of your inventory.

### Simplify your business.

As your single-source partner for transportation and fulfillment, Amware gives you a best-in-class logistics capability, while allowing you to focus on improving and growing your core business.
